; Sequence 288 Application US/09925300
; Patent No. US20020151681A1
; GENERAL INFORMATION:
; APPLICANT: Craig Rosen,
; APPLICANT: Steve Ruben
; TITLE OF INVENTION: Nucleic Acids, Proteins and Antibodies
; FILE REPERENCE: PA101
; CURRENT APPLICATION NUMBER: US/09/925,300
; CURRENT FILING DATE: 2001-08-10
; PRIOR APPLICATION NUMBER: 60/124,270
; PRIOR PLICATION NUMBER: 60/124,270
; PRIOR FILING DATE: 1999-03-12
; NUMBER OF SEQ ID NOS: 1890
; SOFTWARE: PatentIN Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1024

Submitted (13-MAY-2003) BD Biosciences Clontech, 1020 East Meadow
Circle, Palo Alto, CA 94303, USA

This CDS clone is a part of a collection of human full length
expression clones generated by BD Biosciences Clontech and the
Harvard Institute of Proteonics. Each CDS has been cloned in two
forms: with and without stop-codon (to allow fusion with C-terminal
tag). The CDS has been directionally cloned using BD In-Fusion TW)
cloning system between the Sall and Hindill sites of the pDNR-DUAL
vector. Additional sequences in the clone: 'ACC' after Sall site
and before 'Hiddill site to maintain reading frame.
Clone distribution: http://bioinfo.clontech.com/orfclones.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           /codon_start=1

116 GOTTOMOGRACIO CONTROLINA CONT		A NOI S	_	JOURNAL Unpublished  REFERENCE 2 (bases 1 to 1998) AUTHORS Kalnine, M., Chen, X., Rolfs, A., Halleck, A., Hines, L., Eisenstein, S., Kundinya, M., Raphael, J., Moreira, D., Kelley, T., LaBaer, J., Lin, Y., Roundinya, M., and Farmer, A.  TITLE Direct Submission JOURNAL Submitted (13-MAY-2003) BD Biosciences Clontech, 1020 East Meadow	CITCLE, FAIO ALCO, CA 79309, 036  This CDS clone is a part of a collection of human full length expression clones generated by BD Biosciences Clontech and the expression clones generated by BD Biosciences Clontech and the farvard Institute of Proteomics. Each CDS has been cloned in two forms: with and without stop-codon (to allow fusion with C-terminal tag). The CDS has been directionally cloned using BD In-Fusion(TM) cloning system between the Sall and HindIII sites of the pDNR-DUAL vector. Additional sequences in the clone: 'Acc' after Sall site	last codon and before HindIII site to maintain reading frame.  Clone distribution: http://bioinfo.clontech.com/orfclones. Location/Qualifiers Source /organism="synthetic construct" /mol_type="mRNA" /db_xref="textoness" /location-mcMn024510"	/clone_libe=BD Creator(TM) CDS Library derived from MGC collection" /lab host="DHSalpha T1 resistant" /note="Vector: pDNR-Dual" 1>1998 /note="Mutations: 1997:Stop->Leu" /codon start=1	/trails_Lant-lano sapiens kinesin-like 4" /product="Homo sapiens kinesin-like 4" /protein_id="AAP186560.1" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /db_cref="G1:30584615" /rdccref="G1:30584615" /rdccre
